What is a Tuberculosis Lab Report?

Nikki Houston - 2018-08-22 - in Students

The tuberculosis (TB) blood test, also called an Interferon Gamma Release Assay or IGRA, is a way to find out if you have TB germs in your body. The TB blood test can be done instead of a TB skin test (Mantoux). There are two kinds of TB blood tests: QuantiFERON®-TB.

Below is an example of a lab report:
